(8) TOTAL AREA CROPPED IN 1912-13.

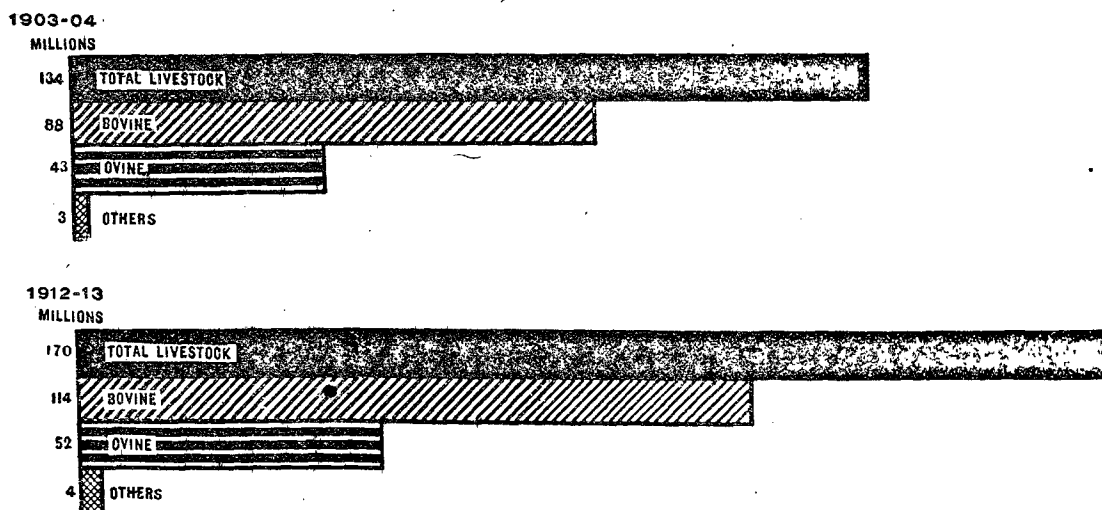

Total area cropped . . . . . 255 million acres.  
 Area under food crops (shaded) . . . . . 212 million acres.  
 Area under non-food crops (unshaded) . . . . . 43 million acres.

NOTE.—*Other food crops* are minor food-grains, condiments and spices, and miscellaneous food crops.  
*Other non-food crops* are oilseeds other than sesamum, rape and mustard, linseed, fibres other than cotton and jute, dyes, drugs and narcotics and miscellaneous non-food crops.

(9)

TOTAL LIVESTOCK, DIVIDED BETWEEN BOVINE, OVINE AND OTHERS IN 1912-13, AS COMPARED WITH THE YEAR 1903-04.

NOTE.—*Bovine* includes bulls and bullocks, cows, buffaloes, calves and buffalo calves.  
*Ovine* includes sheep and goats.  
*Others* include horses and ponies, mules, donkeys and camels.

# AGRICULTURAL STATISTICS OF INDIA

## 1912-13

### VOLUME I—BRITISH INDIA

#### Report

To

THE SECRETARY TO THE GOVERNMENT OF INDIA,  
DEPARTMENT OF REVENUE AND AGRICULTURE.

SIR,

I have the honour to submit the first volume of Agricultural Statistics for 1912-13. This annual volume is the twenty-ninth of the series started in 1886, with statistics for 1884-85, but it should perhaps be regarded as the first of a new series. Summary tables have been inserted to show the total figures relating to area, the classification of area, the area under crops, live stock, land revenue assessment, transfers of land for British India and each province, with a table on world crops. Explanatory notes have been inserted as footnotes to the tables. A series of charts and an index for easy reference have been added to the volume. The publication of the volume has been delayed owing partly to the extra labour connected with the changes in the volume, and partly to pressure of more urgent work on account of the war. In future years it is hoped to issue the volume earlier than has previously been the practice.

The statistics are compiled from annual returns furnished by the Local Governments and Administrations. Detailed information as to the sources from which the figures are collected in the different provinces is given in footnotes to the respective tables for each province. The statistics consist of six separate tables, namely, I—Area; II—Classification of area; III—Area under crops; IV—Live stock, ploughs, and carts; V—Land Revenue Assessment; and VI—Transfers of property in land. The totals of the figures given in these tables are shown in a series of summary tables. In addition to these there are four appendices:—A, B, C, and D. Appendix A deals with the average yield per acre of principal crops; Appendix B shows the changes made in district, divisional, and provincial boundaries; Appendix C gives the meaning of vernacular words used in the volume; and Appendix D contains an alphabetical list of crops cultivated in India and their classification in table III. This volume, it may be noted, deals with the agricultural statistics of British Provinces, while Volume II deals with those of Native States\* as far as they are reported.

The period covered by the volume is the quinquennium ending 1912-13. The returns for each province relate to the following dates:—

|                                                                 |                       |
|-----------------------------------------------------------------|-----------------------|

\* In Appendix A (Volume I), however, figures relating to Mysore are included.

It may be noted that the statistics relating to areas irrigated (Table II) and areas under crops and specification of crops (Table III) generally include the *kharif* and *rabi* crops, and relate to the year closing with the harvesting of the *rabi* or spring crop.

The total area of India is 1,799,000 square miles, or 1,151,574,000 acres, with a population of 315 millions according to the census of 1911. This may be divided as follows :—

|                                                                                                                                                             | Acres.        | Population. |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|-------------|
| (1) British Provinces (including Native States under the control of Local Governments and Administrations) .                                                | 749,207,000   | 267,164,000 |
| (2) Native States having direct political relations with the Government of India . . . . .                                                                  | 316,396,000   | 44,767,000  |
| (3) Specially administered territories in Burma (Shan States) and in the North-West Frontier Province (Tribal areas, etc.) not included under (1) . . . . . | 51,265,000    | 2,738,000   |
| (4) British Baluchistan (including administered areas) . . . . .                                                                                            | 34,706,000    | 414,000     |
| Total . . . . .                                                                                                                                             | 1,151,574,000 | 315,083,000 |

No returns of agricultural statistics are prepared for (3) specially administered territories in Burma and in the North-West Frontier Province, nor for (4) British Baluchistan.

Table I.  
Total area.

The total area of the British Provinces dealt with in this volume—748,869,000 acres,\* or 1,170,000 square miles—includes 129,942,000 acres, with a population of some 26 millions, belonging to Feudatory and Tributary States, which are under the control of Local Governments and Administrations. These include in Burma the Môngmit Staté, the Hkamte Long State, and the Upper Chindwin States; in Assam, Manipur and the Khasi and Jaintia Hill States; in Bengal, Cooch Bihar and Hill Tippera; in Bihar and Orissa, the Tributary States of Orissa and Chota Nagpur; in the United Provinces, Rampur, Tehri, and Benares; in the Punjab, the Phulkian States, Bahawalpur, the Delhi and the Julandhar Division States, and the Simla Hill States; in the North-West Frontier Province, the Phulera and Upper Tanawal States; in Sind, the Khairpur State; in Bombay, the Gujarat States (excluding Baroda), the Konkan States, the Satara Jagirs, and the Southern Mahratta States; in the Central Provinces, the Chhattisgarh States; and in Madras, the States of Travancore, Cochin, Pudukkottai, Banganapalle, and Sandur. Of these States, Agricultural Statistics are prepared for most of the States in the Punjab and all the States in Madras; but they are dealt with in Volume II along with the States having direct political relations with the Government of India.

Thus, by deducting 129,942,000 acres belonging to Feudatory and Tributary States from the total area of 748,869,000 acres included in British Provinces, a balance of 618,927,000 acres is left (as shown in Table I), which represents the area of British territory according to professional survey. The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in the Southern Presidencies. The Agricultural Statistics are, however, prepared in a number of provinces or parts of provinces from “village papers”, *i.e.*, papers prepared by the village accountants for the purposes of assessment and collection of land revenue. The area given in the village papers of the United Provinces, the Central Provinces and Berar, Madras, the Punjab, and the North-West Frontier Province differs to some extent from the area ascertained by professional survey. The causes of this difference are: (a) while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas; and (b) the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and rail roads, is not

\* Excluding 238,000 acres for the new Delhi Province (created in 1912-13), for which statistics for 1912-13 are not available.

uniform in the two sets of returns. Substituting the area by village papers for the area by survey, in respect of provinces and tracts where the two sets of returns differ, the actual area of British territory for which statistics are given in this volume is 616,738,000 acres, or 964,000 square miles, as against 618,927,000 acres or 967,000 square miles according to the professional survey.

This area is classified, for the purposes of Agricultural Statistics, as shown Table II.

|                                    | Thousand<br>acres. | Per<br>cent. | in the margin. About            | Classification of<br>area. |

propriated to uses other than agriculture, amounts to 146,387,000 acres or 24 per cent. The balance, 387,951,000 acres or 63 per cent, represents the area available for cultivation. Of this, 115,025,000 acres, or 19 per cent of the total area, represent culturable waste, *i.e.*, land available for cultivation but not yet taken up, and 48,760,000 acres, or 8 per cent, were kept fallow in the year of report. The net area actually cropped in the year was therefore

|                              | Proportion of<br>cropped to<br>total area. |                                                                               |
|------------------------------|--------------------------------------------|-------------------------------------------------------------------------------|

| Ajmer-Merwara                | 20 "                                       | once in the year. If areas cropped more                                       |
| Assam                        | 19 "                                       | than once are taken as separate areas                                         |
| Coorg                        | 14 "                                       | for each crop, the gross area cropped in                                      |
| Sind                         | 13 "                                       | the year of report amounts to 255,356,000 acres, against 249,002,000 acres in |
| Burma                        | 13 "                                       | the preceding year.                                                           |

the year of report amounts to 255,356,000 acres, against 249,002,000 acres in the preceding year.

The term "forests" in the returns of Agricultural Statistics means Forests. "any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may, however, be excluded and entered in the column "net area cropped". The forest areas returned in the Agricultural Statistics do not agree in most cases with those stated in the reports on the administration of the Forest Department for various reasons,\* the chief amongst which are the following:—(1) the forest administration reports and the returns of agricultural statistics relate in many cases to different periods, (2) the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics exhibit in addition forest areas administered by district officers; (3) certain village lands worked by the Forest Department and returned as forest lands by that Department are not treated as forests in the returns of agricultural statistics. Of the total forest area returned in the agricultural statistics (82,400,000 acres in 1912-13), 23 per cent lies in Burma, 21 per cent in the Central Provinces and Berar, 14 per cent in the Madras Presidency, 11 per cent in the United Provinces, 10 per cent in the Bombay Presidency, and the remaining 21 per cent in other provinces.

As can naturally be expected, most of the barren and unculturable lands lie in the hilly tracts of Burma and of Southern India and in the dry and deserty regions of North-Western India. Of the total area "not available for cultivation" (146,387,000 acres in 1912-13) about 30 per cent lies in Burma, 16 per cent in the Madras Presidency, 10 per cent in Sind, and 9 per cent in the Punjab.

The head "culturable waste other than fallow" shows lands available for cultivation but not taken up. It includes areas such as groves not classed in the cropped area, and areas under bamboos and thatching grass when not

\* For differences in respect of provinces, see notes at foot of tables Nos. 23 to 40.

forming parts of forests areas.\* Of the total culturable waste lands (115,025,000 acres in 1912-13), 22 per cent is in Burma, 15 per cent in the Punjab, 13 per cent in Assam, 12 per cent in the Central Provinces, 9 per cent in the Madras Presidency, and the remaining 29 per cent in the other provinces.

Current fallows.

The maximum period for which land left uncultivated is reckoned as fallow varies in the different provinces, from two years in the Punjab and the North-West Frontier Province to ten years in the Bombay Presidency, according to local laws and customs. After this period the land, if still left uncultivated, is treated as abandoned and included under the head "culturable waste". Owing to this diversity of practice, the classification as between "culturable waste" and "current fallows" is of doubtful statistical accuracy; a plot of land, for instance, left uncultivated for, say, 6 years, would be treated as fallow in the Bombay Presidency but as culturable waste in the Punjab. The total area returned as "current fallow" in 1912-13 was 48,760,000 acres, as against 54,982,000 acres in the preceding year, or a decrease of 11 per cent.

Irrigation.

The total area irrigated in 1912-13 was 45,539,000 acres, as against 40,679,000 acres in the preceding year. Of this, 17,764,000 acres were irrigated from Government canals, 2,493,000 acres from private canals, 6,825,000 acres from tanks, 12,351,000 acres from wells, and 6,106,000 acres from other sources of irrigation. In India irrigation on an extensive scale is ordinarily resorted to in tracts where the rainfall is most precarious. In Lower Burma, Assam, Eastern Bengal, and the Malabar Coast (including the Konkan),

|                                        | Proportion of<br>irrigated to<br>total cropped<br>area. |

| United Provinces . . . . .             | 27 "                                                    |
| Bihar and Orissa . . . . .             | 18 "                                                    |
| Bengal . . . . .                       | 9 "                                                     |
| Burma . . . . .                        | 8 "                                                     |
| Assam . . . . .                        | 6 "                                                     |
| Bombay . . . . .                       | 4 "                                                     |
| Central Provinces and Berar . . . . .  | 4 "                                                     |
| Coorg . . . . .                        | 3 "                                                     |
| Manpur . . . . .                       | 3 "                                                     |

where the rainfall is ordinarily heavy, the crops hardly need the help of irrigation, unless there is an unusual scarcity of rain. Of the total area irrigated in 1912-13, 25 per cent was in the Punjab, 22 per cent in the Madras Presidency, 21 per cent in the United Provinces, 10 per cent in Bihar and Orissa, 7 per cent in Sind, and the remaining 15 per cent in the other provinces. The proportion of irrigated to total cropped area in each province is stated in the margin.

The figures in the preceding paragraph do not take into account areas cropped more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. Counting areas cropped more than once as separate areas for each crop, the gross area of irrigated crops was 49,200,000 acres in 1912-13, against 44,400,000 acres in the preceding year. Of this area, 41,800,000 acres, or 85 per cent, were under food crops, and 7,400,000 acres or 15 per cent under non-food crops. Of the irrigated food-crop area, 9,100,000 acres were cropped with wheat, 28,100,000 acres with other cereals and pulses, and 4,600,000 acres with other food crops. These statistics of irrigated crops are in some cases defective as explained in the notes at the foot of table II (pages 46-49).

Table III.  
Area under crops.

The areas cultivated with the different crops represent the areas actually sown, whether the crop comes to maturity or not, except in cases where fields, owing to the failure of the first sowings, have been devoted to other crops; in such cases the area first sown is omitted. In cases where two or more crops are grown together on the same field, an estimate is made of the area covered by each, and the areas so estimated are separately returned under the respective crop headings. The estimate is made by the village accountant, or is subsequently determined on formulæ prescribed by the provincial authorities. In certain tracts, where the village staff does not exist, estimates are made on the best available information. An exception to the above rule is, however, made in the United Provinces, where the area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements, is assigned to the principal crops by the village accountant. In the same

\* For details in provinces, see notes at foot of tables Nos. 26 to 40.

province this procedure is also followed in the case of oilseeds thinly sown in combination with food-grains; in this case the whole area of the mixed field is assigned to food grains.

The gross area cultivated with crops was, as stated above, 255 million acres in 1912-13 as against 249 million acres in the preceding year, or an increase of 6 million acres or 2·5 per cent. The different classes of crops and the area occupied by each are stated in the margin. Of the total cropped area, food-

|                                        | Thousand<br>acres. | Per cent<br>of total. | crops occupied about           |

together) occupied some 10,900,000 acres or only 4 per cent of the total. Of non-food crops, fibres, such as cotton, jute, hemp, etc., occupied 18,268,000 acres or 7 per cent of the total cropped area, and oilseeds occupied 14,936,000 acres or 6 per cent. The other non-food crops \*—dyes, drugs and narcotics (tobacco, tea, coffee, opium, etc.), fodder crops, and miscellaneous non-food crops—together occupied some 9,408,000 acres or about 4 per cent of the total.

The area under food-grains (201,372,000 acres) showed a net increase of 6,275,000 acres or 3 per cent as compared with the preceding year. The

| Bajra . . . . .                   | 13,093          | 16,269  | + 3,176                            |
| Ragi . . . . .                    | 4,296           | 4,456   | + 160                              |
| Maize . . . . .                   | 5,591           | 6,316   | + 725                              |
| Gram . . . . .                    | 14,129          | 12,423  | - 1,706                            |
| Other grains and pulses . . . . . | 29,507          | 30,907  | + 1,400                            |

actual increase or decrease under each kind of grain is stated in the marginal table. It will be seen that while the principal *rabi* (spring) crops, (wheat, barley, and gram) showed an aggregate decrease of 3,883,000 acres, the principal *kharif* (autumn) and *aghani* (early winter) crops, (jawar, bajra, ragi, maize, and rice) showed an aggregate increase of 8,758,000 acres. The increase in the area under autumn and early winter crops may be ascribed to the good monsoon rainfall of the year, and the decrease in the area under spring crops to the failure of the winter rains, particularly in Northern India. Minor grains and pulses also showed an increase of 1,400,000 acres. Of the total area shown in the table under food-grains (201 million acres in 1912-13), 16 per cent was in the United Provinces †, 15 per cent in the Madras Presidency, 14 per cent in Bihar and Orissa, 11 per cent in Bengal, 10 per cent each in the Punjab and the Bombay Presidency, 9 per cent in the Central Provinces and Berar, and the remaining 15 per cent in the other provinces.

The area under oilseeds (14,936,000 acres) showed a decrease of 1,559,000 acres or 9 per cent as compared with the preceding year. The actual decrease

|                            | THOUSAND ACRES. |         |          |
|----------------------------|-----------------|---------|----------|
|                            | 1911-12         | 1912-13 | Decrease |
| Linseed . . . . .          | 3,763           | 3,125   | - 638    |
| Sesamum . . . . .          | 4,174           | 4,164   | - 10     |
| Rape and mustard . . . . . | 4,225           | 3,555   | - 670    |
| Other oilseeds . . . . .   | 4,333           | 4,092   | - 241    |

under each kind of oilseeds is stated in the margin (in thousands of acres). It will be seen that the decrease was largest in the case of the *rabi* oilseeds, namely, linseed and rape and mustard, and was due, as in the case of *rabi* food-grains, to the failure of the winter rains. Sesamum, which is mainly an autumn (*kharif*) crop, showed only a small decrease. Other oilseeds are groundnut, castor, dill or sowa, nigerseed, and sun flower. These also showed an aggregate decrease of 241,000 acres. Of

\* For a list of these, vide Appendix D.

† In the United Provinces, the whole of the area of the land sown with food-grains mixed with oilseeds is shown under food-grains in this table. The area included under food-grains, which was really sown with oilseeds (as a mixed crop), is roughly estimated to have been 4,000,000 acres in the whole province in 1912-13. Excluding this area of 4 million acres of oilseeds, the total area under food-grains in British India in 1912-13 would come to 197 million acres instead of 201 million acres stated above.

the total area under oilseeds shown in this table (15 million acres), 19 per cent was in the Madras Presidency, 18 per cent in the Central Provinces and Berar, 15 per cent in Bihar and Orissa, 12 per cent in Bengal, 9 per cent in Burma, 8 per cent in the Bombay Presidency, 7 per cent each in the Punjab and the United Provinces,\* and the remaining 5 per cent in the smaller provinces.

Condiments and  
spices.

The total area under condiments and spices in 1912-13 was 1,390,000 acres as against 1,502,000 acres in the preceding year, or a decrease of 112,000 acres or 7 per cent. The crops included under this head are ajmud or randhuni (*Carum Roxburghianum*), ajwan (Bishop's weed), anise seed, caraway, chillies, coriander, cumin, fennel, fenugreek, garlic, ginger, marjoram, mint, nutmeg, onion, pepper, sago, tamarind, and turmeric. As is to be expected, spices are grown mostly in the southern parts of India: nearly half (46 per cent) of the total area under condiments and spices in 1912-13 was in the Madras Presidency and 13 per cent in the Bombay Presidency.

Sugar.

The total area under sugar in 1912-13 was 2,712,000 acres against 2,566,000 acres in the preceding year, or an increase of 146,000 acres or 6 per cent. Of this area, about 2,547,000 acres were occupied by sugarcane, as against 2,410,000 acres occupied by that crop in the preceding year. More than half (52 per cent) of the sugarcane area was in the United Provinces, 14 per cent in the Punjab, 11 per cent in Bihar and Orissa, 9 per cent in Bengal, and 4 per cent in the Madras Presidency. The other sugar-yielding plants, namely, date palm and palmyra palm, occupied a total area of 165,000 acres as against 155,000 acres in the preceding year. About 53 per cent of this area was in the Madras Presidency and 30 per cent in Bengal.

Fibres.

The total area under fibre crops was 18,268,000 acres in 1912-13 as against 18,348,000 acres in the preceding year, or a decrease of 80,000 acres or 0.4 per cent. The actual increase or decrease under the several kinds of fibre are

|                       | THOUSAND ACRES |         | Increase (+)<br>or<br>Decrease (-) |
|-----------------------|----------------|---------|------------------------------------|
|                       | 1911-12        | 1912-13 |                                    |
| Cotton . . . . .      | 14,568         | 14,138  | - 430                              |
| Jute . . . . .        | 3,091          | 3,324   | + 233                              |
| Other fibre . . . . . | 689            | 806     | + 117                              |

shown in the marginal table. The area under cotton showed a decrease of 430,000 acres or 3 per cent. Of the total cotton area, 32 per cent was in the Central Provinces and Berar, 30 per cent in the

Bombay Presidency, 17 per cent in the Madras Presidency, 10 per cent in the Punjab, and 8 per cent in the United Provinces. The area under jute showed an increase of 233,000 acres or 8 per cent. About 88 per cent of the total jute area was in Bengal and the remaining 12 per cent in Bihar and Orissa and Assam. Other fibres also showed an increase of 117,000 acres or 17 per cent as compared with the preceding year. These are agave, sunn hemp, sisal hemp, Deccan hemp, rhea, sabai grass, and swallow-wort.

Dyes.

The total area under dyes was 639,000 acres in 1912-13. Of this, the area occupied by indigo was 227,000 acres in 1912-13 as against 274,000 in the preceding year, or a decrease of 47,000 acres or 17 per cent. The cultivation of the indigo plant continues declining, owing to the competition of the synthetic dye.† Of the total indigo area, 40 per cent was in Bihar and Orissa, 30 per cent in the Madras Presidency, 17 per cent in the Punjab, and 12 per cent in the United Provinces. Other dyes, comprising arnatto, henna, madder, morinda, and safflower, occupied an aggregate area of 412,000 acres.

Drugs and narcotics.

The total area under drugs and narcotics was 1,931,000 acres in 1912-13 as against 1,910,000 acres in the preceding year. The actual increase or

|                       | THOUSAND ACRES |         | Increase (+)<br>or<br>Decrease (-) |

| Opium . . . . .       | 220            | 197     | - 23                               |
| Coffee . . . . .      | 95             | 92      | - 3                                |
| Tea . . . . .         | 544            | 558     | + 14                               |
| Tobacco . . . . .     | 999            | 965     | - 34                               |
| Cinchona . . . . .    | 4              | 4       | ...                                |
| Indian hemp . . . . . | 2              | 2       | ...                                |

decrease under each of the principal kinds of drugs and narcotics is stated in the margin. Of the four principal kinds of drugs and narcotics, namely, opium, coffee, tea, and tobacco, only tea showed an increase, while the others showed a decrease. The areas

\* The figures for the several heads of oilseeds in this table against the United Provinces of Agra and Oudh represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop, excluding the oilseeds which are thinly sown in combination with wheat, barley, gram, and other crops. If the areas occupied by the scattered oilseeds plants were added up, it is estimated very roughly that they would amount in 1912-13 for the whole of the United Provinces to about 4 million acres. Including this area, the total area under oilseeds in British India in 1912-13 would come to 19 million acres instead of 15 million acres stated above.

† Cf. Review of Trade, 1913-14, under "Indigo," Chapter III, pages 20-21.

under cinchona and Indian hemp (ganja) remained practically the same as in the preceding year. Other drugs and narcotics, comprising arecanut, sweet basil, betel vine, country borage, dhatura, purple flea-bane, isafgul, and senna, occupied an aggregate area of 112,000 acres.

The head "fodder crops" shows only those crops which are used exclusively as fodder in normal times. These are oats, field vetch, guinea grass, and carob or locust tree. The total area under fodder crops in 1912-13 was 5,770,000 acres as against 4,978,000 acres in the preceding year.

The total area occupied by fruits and vegetable crops in 1912-13 was 5,466,000 acres as against 4,396,000 acres in the preceding year. [For the names of the fruits and vegetable crops cultivated in India, see Appendix D.]

The total area occupied by miscellaneous crops, that is, crops not classified under any of the heads specified above, was 2,400,000 acres. Of this, about 1,332,000 acres was occupied by miscellaneous food crops and about 1,068,000 acres by miscellaneous non-food crops. [For the names of the crops included under these heads, see footnotes on page 119 and Appendix D.]

The total extent of land on which more than one crop was raised during the year was 31,191,000 acres as against 33,020,000 acres in the preceding year.

The statistics recorded in table IV are based mainly on cattle censuses. The census is, however, not taken simultaneously in the different provinces, nor is it taken every year in all the provinces. In Burma, Manpur Pargana, and the Central Provinces and Berar, the census is taken annually, while in the United Provinces, Assam, Ajmer-Merwara, the Punjab, the North-West Frontier Province, the Bombay Presidency, the Madras Presidency, and Coorg, it is taken once in five years. The last quinquennial census was taken in 1908-09 in the United Provinces, Ajmer-Merwara, the Punjab, and the North-West Frontier Province, and in 1909-10 in the Bombay Presidency, the Madras Presidency, Coorg, and Assam. In Bengal a cattle census was taken for the first time in 1912-13, which gave the numbers of bulls and bullocks, cows, buffaloes, and young stock. [Young stock represents oxen and buffaloes not old enough for work or to produce young.] The figures for Bihar and Orissa, as also those for Bengal, for years prior to 1912-13 are based on estimates. Live-stock in cities and cantonments are included wherever it is possible to secure their enumeration. In making up the totals for British India for each year, the figures last collected in the provinces where annual censuses are not taken are repeated year after year until the next census is taken. It would, therefore, serve no useful purpose to compare the total figures of one year with those of another, as the totals thus constituted do not really represent the number of stock in the year against which the figures are shown in the table. The animals may be divided into three classes, namely, (1) Bovine, comprising bulls and bullocks, cows, buffaloes, and young stock (*i.e.*, calves and buffalo calves), (2) Ovine, comprising sheep and goats, and (3) others, comprising horses and ponies, mules, donkeys, and camels. The total number of live-stock

|                              | Number in thousands |               |        |         | Carts |

of each of these 3 classes in each province, together with the numbers of ploughs and carts, is stated in the margin (in thousands). Of the total number of live-stock of the bovine class (139 millions), which is cattle proper, the United Provinces account for 22 per cent, Bengal 19 per cent, the Madras Presidency 14 per cent, Bihar and Orissa 12 per cent, the Central Provinces and Berar 9 per cent, the Bombay Presidency in-

cluding Sind 7 per cent, and other provinces the remaining 17 per cent. In the case of ploughs also the United Provinces come first with 28 per cent of the total (excluding Bengal for which figures are not available), followed by Madras (22 per cent), Bihar and Orissa (17 per cent), and the Punjab (11 per cent). In the case of stock of the ovine class (sheep and goats), however, Madras accounts for 35 per cent of the total (excluding Bengal), followed by the United Provinces (19 per cent), the Punjab (17 per cent), and the Bombay Presidency including Sind (10 per cent). In the case of carts also, Madras

Table V.  
Land Revenue  
Assessment.

accounts for 25 per cent of the total (excluding Bengal), followed by the Central Provinces and Berar (17 per cent), the United Provinces (16 per cent), and Burma (13 per cent).

The varieties of tenure in the different provinces are included in Table V and are given, as far as possible, under one or other of the following three heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari permanently settled. When the revenue is assessed on an individual or community owning an estate, and occupying a position identical with or analogous to that of a landlord, the tenure is known as *zamindari* or village community; when the revenue is assessed on individuals who are the actual occupants, or are accepted as representing the occupants, of smaller holdings, the tenure is known as *raiayatwari*. Zamindari tenure may be either *permanently settled*, i.e., where the land revenue has been fixed in perpetuity, or *temporarily settled*, i.e., where the land revenue is fixed for a period of years only. Village communities and raiyatwari tenures are as a rule temporarily settled, and the land revenue assessed on them are changeable from time to time.

The following table shows the position in the surveyed areas of the various provinces, as regards the forms of land tenure in 1912-13. The figures roughly indicate the extent to which the different systems prevail :—

| Province.                              | In thousands of acres. |                                                            |                     | Total.  |
|----------------------------------------|------------------------|------------------------------------------------------------|---------------------|---------|
|                                        | Raiyatwari.            | Zamindari (individual proprietors or village communities). |                     |         |
|                                        |                        | Permanently settled                                        | Temporarily settled |         |

| Total . . . . .                        | 295,858                | 122,287                                                    | 200,744             | 618,889 |

The statistics for this table are collected annually in Burma, Assam, Manpur, the Punjab, the North-West Frontier Province, and the Central Provinces and Berar, and quinquennially in Bengal, Bihar and Orissa, the United Provinces, Ajmer-Merwara, Bombay, Sind, Madras, and Coorg.

|                                        | Total revenue from land (R1,000) | Total population (1,000) | Revenue per head R a | (excluding cesses) for the whole of British India amounts to about R32,57,00,000 This represents the actual realisable demand for the year, no account being taken of the collection of arrears for past years, nor of amounts remaining uncollected at the end of the year. Sums remitted on account of unoccupied lands, short crops, etc., are excluded. The marginal table shows the total land revenue assessment, the total population, and the assessment per head of population in each province. |

\* Including Government forests.

The total number of transfers for 1913-14, as recorded in Table VI, was 977,800, of which 948,500 were by private contract or gift, and 29,300 by order of the court. The total area of the transfers by private contract or gift was 5,045,800 acres, and by order of the court 628,900 acres. These statistics are incomplete. They do not include transfers in Bengal (for which figures are not available); in Bihar and Orissa no information is available regarding transfers under orders of civil courts. As explained in the footnotes to Table VI, the figures for other provinces are not always complete. It may be noted that voluntary transfers are those made by actual contract or gift, transfers by succession or inheritance not being taken into account: compulsory transfers are those effected through a court, civil or revenue. Transfers of land under the Land Acquisition Act and temporary transfers, such as leases, simple mortgages, and redemptions of mortgages, are excluded from the table. Mortgages with possession are treated as transfers and included in Table VI.

Table VI.  
Transfers of property  
in land.

The Agricultural Department in each province maintains a statement of the average yield per acre of land of average quality, irrigated and unirrigated, for crops in each district. In order to test the accuracy of the standards of normal or average yield and to revise these, if necessary, a system of crop-cutting experiments exists in all the provinces. Under this system plots of land of average quality are selected, and the crops grown on them are cut and weighed in the presence of responsible officers of the district staff or of the provincial agricultural department. The results of the experiments are reported to the head of the provincial agricultural department, who revises the standards in the light of these returns. This revision is ordinarily made once in five years, although crop-cutting experiments are usually carried out for the principal crops each year. The table (appendix A) shows the figures as last revised with reference to the crop-cutting experiments made up to 1911-12. As time goes on the figures become more accurate, and it may be noted that the general trend of the changes made is in an upward direction. In Bengal the yield of sugarcane has been raised from 2,460 lbs to 2,905 lbs, and that of jute from 1,200 lbs to 1,271 lbs. Maize and rice in the United Provinces have been raised from 1,050 lbs and 850 lbs to 1,100 lbs and 900 lbs, respectively. In the Punjab rapeseed has been raised from 254 lbs to 396 lbs and cotton from 74 lbs to 118 lbs. In Sind cotton has been raised from 308 lbs to 380 lbs, and bajra from 776 lbs to 971 lbs. In Madras irrigated and unirrigated cotton is 87 lbs and 55 lbs against 66 lbs and 44 lbs formerly, while irrigated jawar has been raised from 1,118 lbs to 1,379 lbs. In some instances the standards have been decreased. In Bengal the average yield of winter rice has been put at 983 lbs; in the Punjab of bajra at 379 lbs and of gram at 549 lbs; while the yield of maize in the North-West Frontier Province is now estimated at 1,292 lbs.

Appendices  
Average yield of  
crops.

Appendices B, C, and D perhaps require little or no comment. Appendix B, which shows changes that have been made from time to time in district, or provincial boundaries, will explain the variations in total areas of districts and provinces in Table I, so far as they are due to territorial changes. Appendix C explains vernacular terms used in this volume, and Appendix D the classification in Table III of the various crops cultivated in India.

Territorial changes

Vernacular terms and  
classification of crops.

The charts and diagrams in the volume illustrate (1) total cultivable area, (2) uncultivable area and net area cropped, (3) culturable waste and current fallows, (4) area cropped and area under food crops, (5) area under non-food crops and irrigated area cropped, (6) and (7) areas under selected crops, (8) total area cropped in 1912-13 with shares of food and non-food crops, and (9) live stock divided between bovine, ovine, and others

I have the honour to be,

SIR,

Your most obedient servant,

G. FINDLAY SHIRRAS,

*Director of Statistics.*

DEPARTMENT OF STATISTICS,

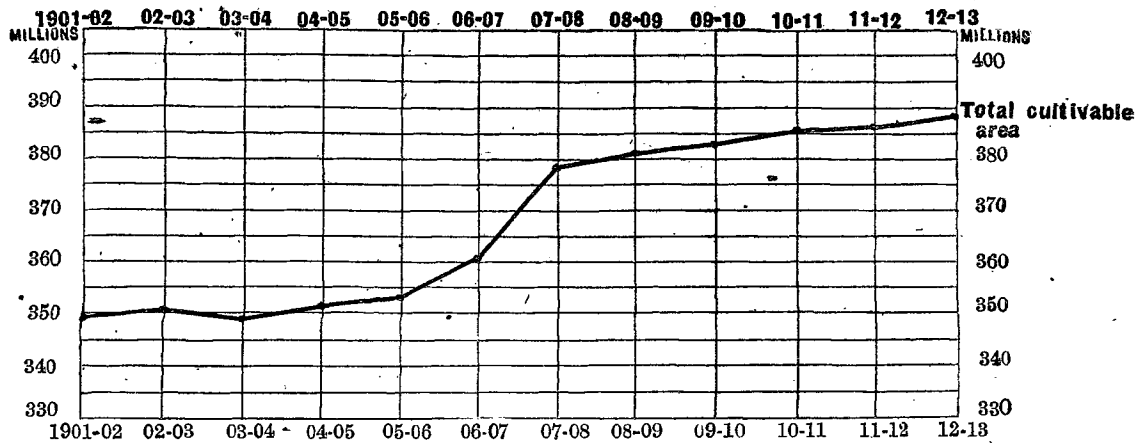

Calcutta, January 28, 1915.

## AREAS

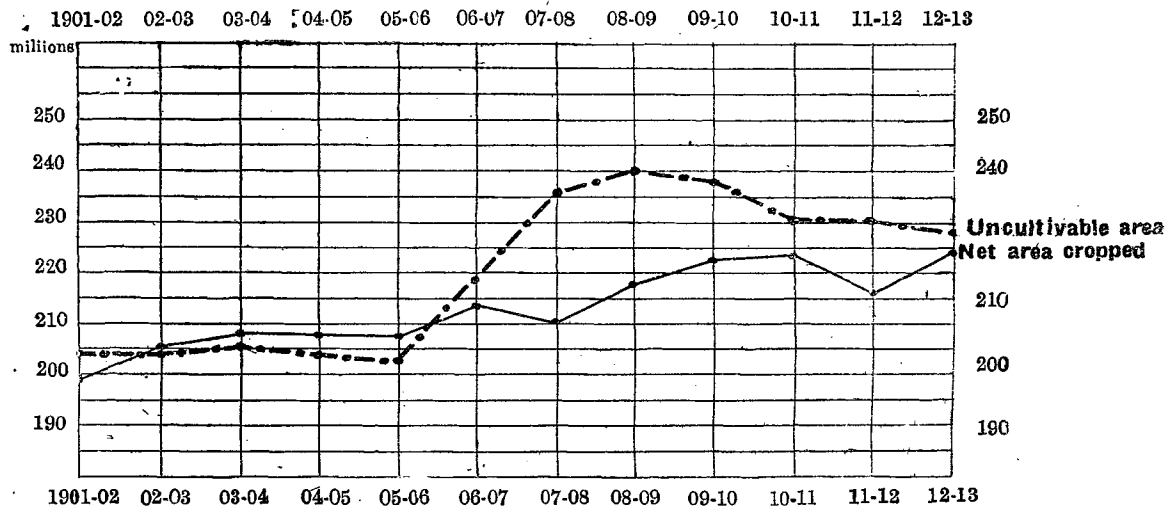

(in millions of acres.)

### (1) TOTAL CULTIVABLE AREA.

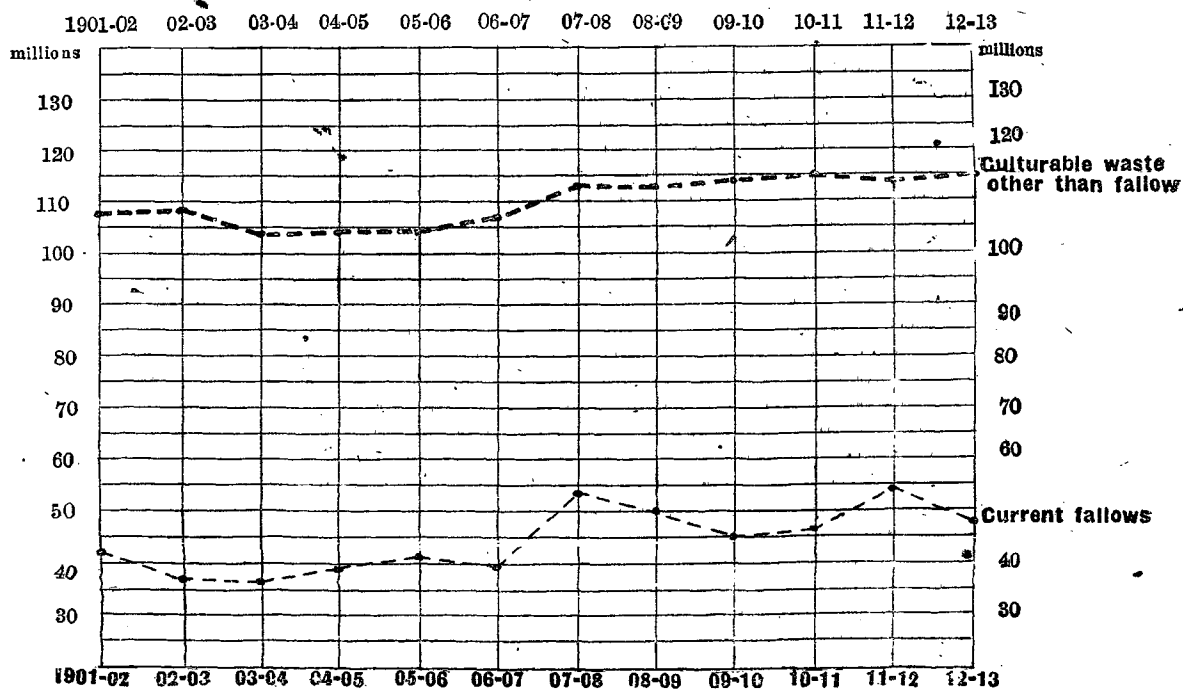

NOTE.—Total cultivable area represents the sum of net area cropped, culturable waste, and current fallows.

### (2) UNCULTIVABLE AREA AND NET AREA CROPPED.

### (3) CULTURABLE WASTE OTHER THAN FALLOW AND CURRENT FALLOWS.

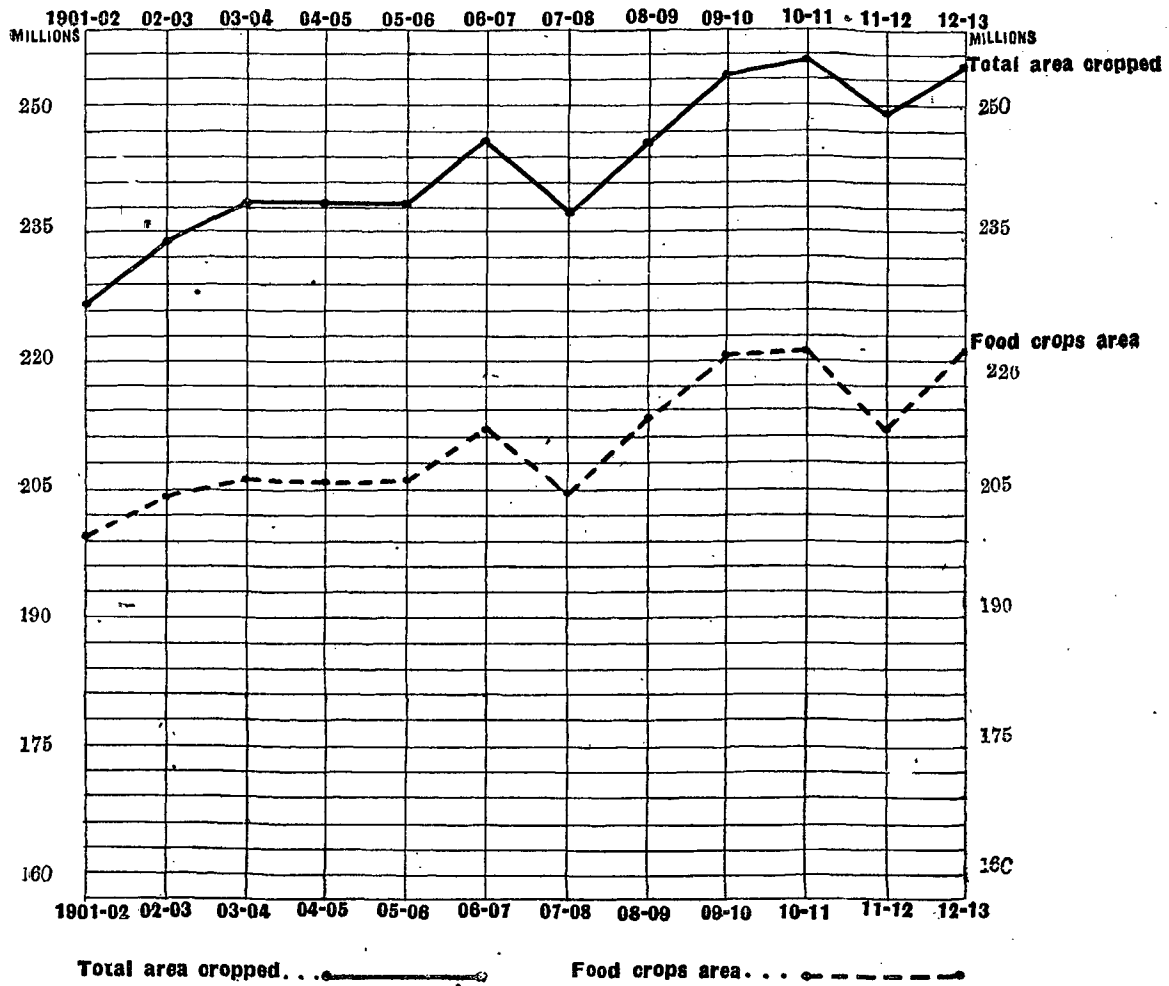

Statistics for years prior to 1907-08 exclude certain areas for which returns were not available.

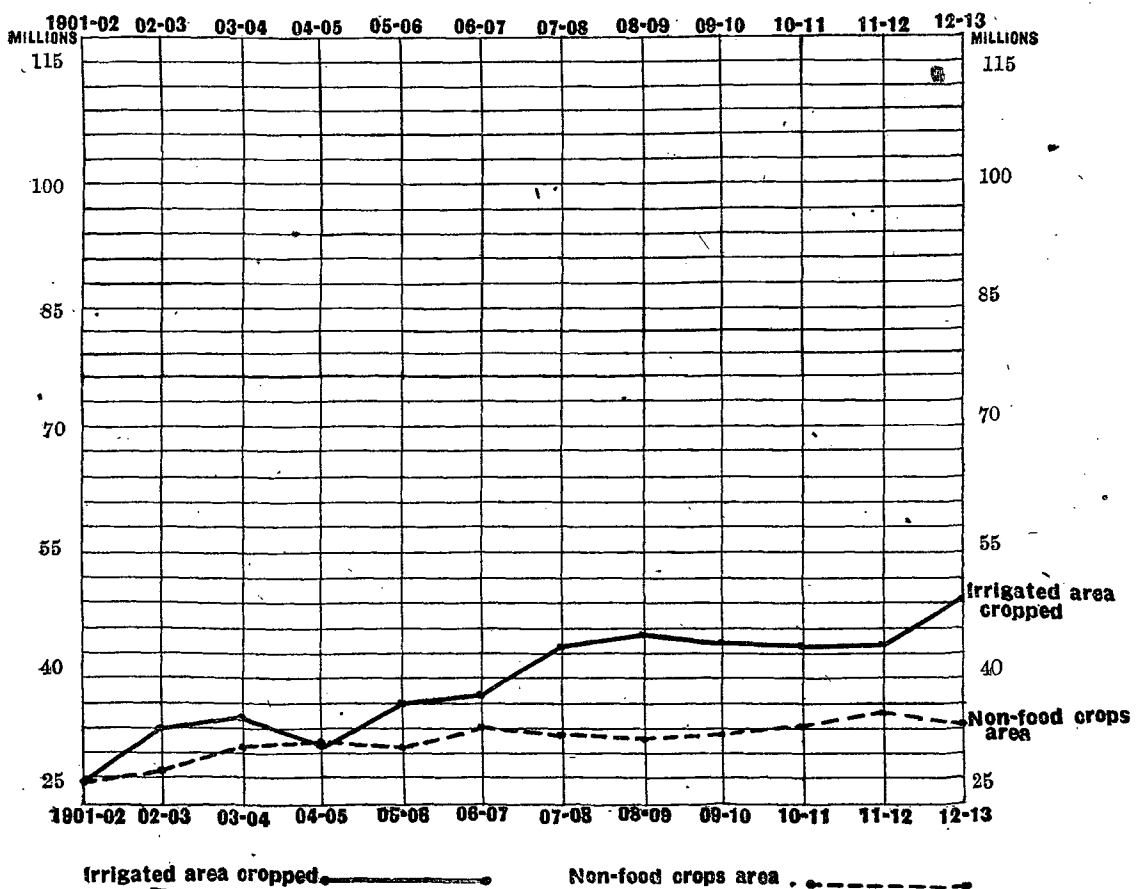

(4) AREA CROPPED AND AREA UNDER FOOD CROPS.

(in millions of acres)

(5) AREA UNDER NON-FOOD CROPS AND IRRIGATED AREA CROPPED.

(in millions of acres)

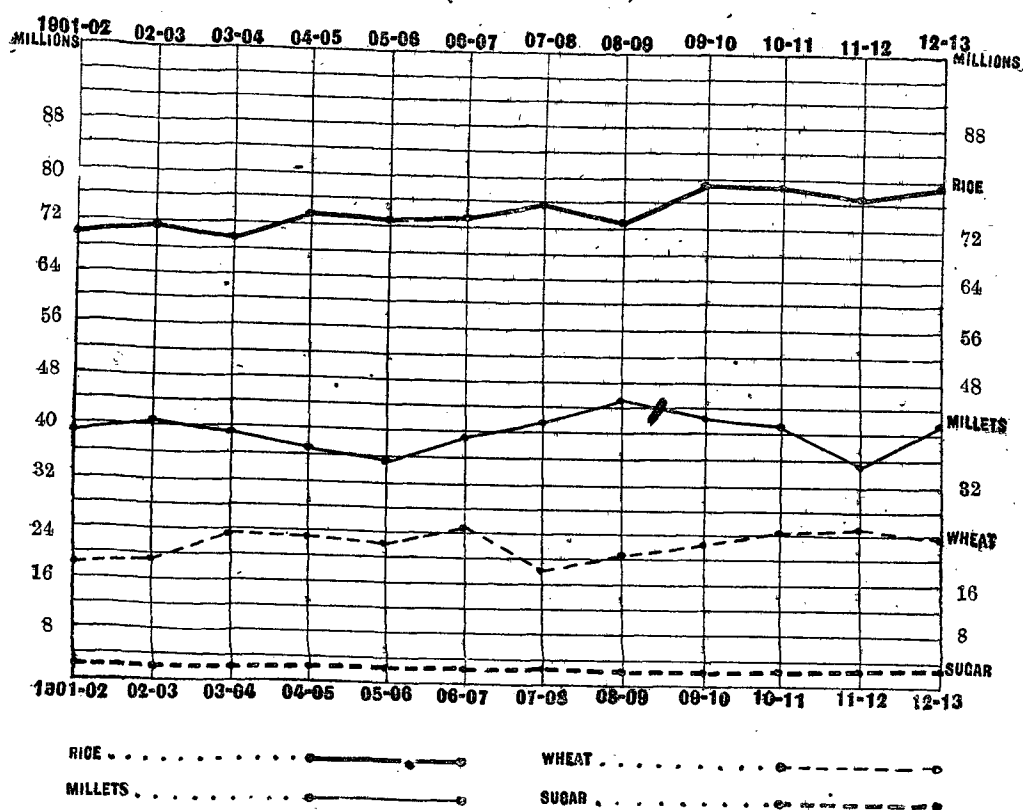

Statistics for years prior to 1907-08 exclude certain areas for which returns were not available.

(6) AREA UNDER SELECTED CROPS.

Rice, Millets, Wheat, Sugar.

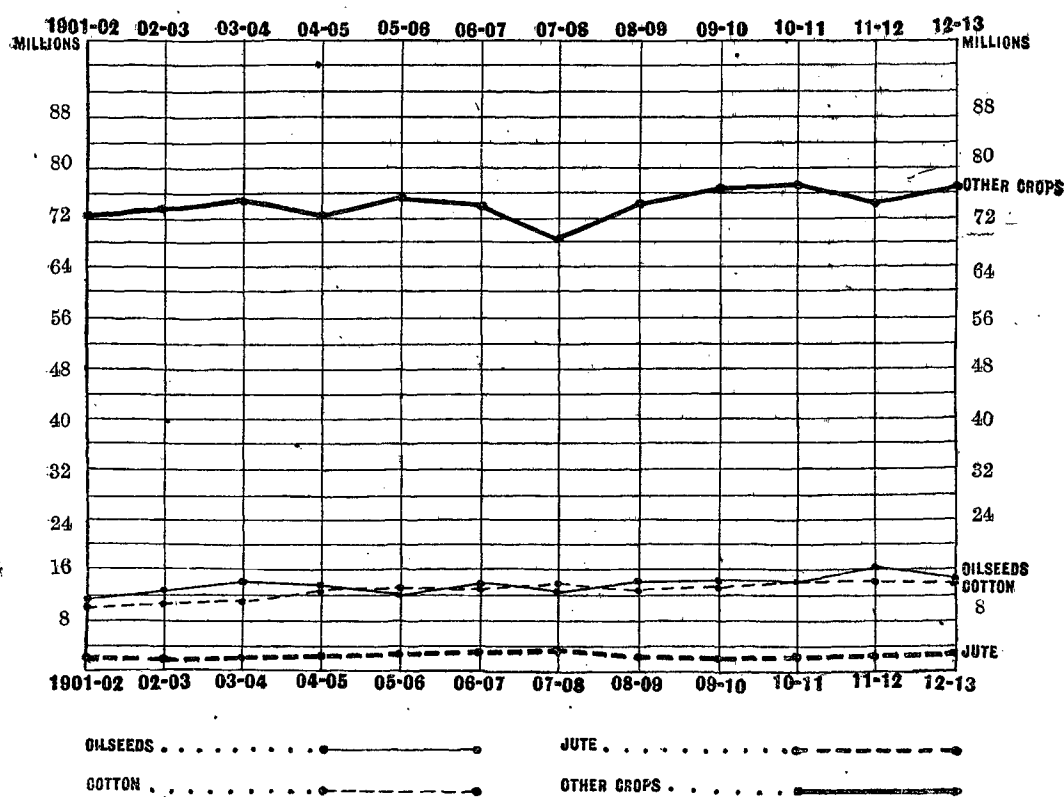

(in millions of acres)

(7) AREA UNDER SELECTED CROPS.

Oilseeds, Cotton, Jute, other crops.

(in millions of acres)

NOTE.—*Other crops* are barley, maize, gram, minor food-grains, condiments and spices, fibres other than cotton and jute, dyes, drugs and narcotics, fodder crops, fruits and vegetables and miscellaneous crops.

Statistics for years prior to 1907-08 exclude certain areas for which returns were not available.

(a) Including Croatia and Slavonia

(b) Excluding Isle of Man and Channel Islands

(c) Includes Sorghum

(d) Late-sown Maize only

\* Including figures for Native States, namely, 2,478,000 acres for rice, 6,314,000 acres for wheat, 980,500 acres for barley, 1,062,900 acres for maize, and 7,997,000 acres for cotton. The figures for rice, barley, and maize for Native States are, however, not complete, as returns for those crops are not furnished by a number of States.

Note.—The figures for foreign countries have been taken partly from Part V of the Agricultural Statistics published by the Board of Agriculture and Fisheries, United Kingdom, and partly from the Bulletins of Agricultural and Commercial Statistics published by the International Institute of Agriculture, Rome.

(a) Increase due to adoption of the latest census figures

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in the Southern Presidencies. The provincial areas in this column exclude Native States in direct political relations with the Government of India, but include Feudatory or Tributary States politically controlled by Local Governments, with the exception of the Shan States in Burma and Tribal areas in the North-West Frontier Province

Column 3.—In this column is entered the area of any Feudatory or Tributary States included in column 2

Column 4.—Prior to 1908-09 this column showed the entire area (exclusive of Native States) for which the statistics required for tables II and III were not forthcoming in whole or in part. This area comprised chiefly estates held in permanent settlement or on privileged tenure, which were not surveyed or which possessed no agency for the annual collection of agricultural statistics. But arrangements have since been made to prepare statistics, for the whole of this area, based either on regular returns or on estimates as has been found practicable. There is therefore no longer any unreturned area to be shown in this column

Columns 5 and 6.—Column 5 is a check on the accuracy of column 6. In the latter "village papers" means "the papers prepared by the village accountants." They do not in several provinces relate to the whole area included in column 5; for instance, the village returns sometimes do not include the forest areas. In such cases, column 6 must be taken to be the total area corrected by the village papers in respect of the areas for which such papers exist. The area of provinces and districts which are calculated from village papers are necessarily somewhat different from those given by the Survey Department, (a) because, while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas; and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads, is not uniform in the two sets of returns. In provinces where no village papers exist, the figures in column 5 have been repeated in column 6. In that case they represent the area of which the details are stated in columns 2 to 6 of Table II

Table I—*continued*No. 9—AREA (IN ACRES) OF EACH PROVINCE IN BRITISH INDIA—*continued*

| PROVINCE                 | Area according to professional survey | Deduct                         |                                 | Net area by professional survey | Corresponding area in village papers |
|--------------------------|---------------------------------------|--------------------------------|---------------------------------|---------------------------------|--------------------------------------|

*Note.*—(1) The variations in the figures for 1912-13 for certain districts are due to adoption of the latest census figures. The area cadastrally surveyed comprises 14,737,038 acres or about 35 per cent of the total area of the province (exclusive of Native States). The figures for the remaining area of the province are based more or less on estimates.

(2) For explanations of all material changes in area according to professional survey, in this as well as in the succeeding section of Table I, reference is invited to the table stating changes made in boundaries, Appendix B.

Column 2 states the area as ascertained by the provincial survey department supplemented, for tracts which have not come under the operations of that department, by areas obtained with the computing scale from the Survey of India atlas sheets of the localities concerned.

Columns, 5 and 6.—Up to 1906-07 these columns excluded the major portion of the zamindari estates and certain raiyatwari and whole inam villages for which statistics were not available, but from 1907-08 estimates for all these areas have been prepared and included. It should, however, be borne in mind that these estimates are not comparable for accuracy with the figures which are collected by adequate agency employed for the purpose. Of the total area (89,542,520 acres) entered in column 6 for 1912-13 (page 20), 66,876,146 are based on actual returns and 22,666,374 on estimates.

Table I—continued

No. 11—AREA (IN ACRES) OF EACH DISTRICT IN MADRAS—continued

| District            | Area according to professional survey | Deduct                         |                                 | Net area by professional survey | Corresponding area in village papers |

Column 2 states the area as returned by the provincial revenue survey and settlement department, supplemented in the case of Native States by the returns of the topographical survey

Columns 5 and 6.—The figures of column 5 are repeated in column 6, because the areas in village papers are derived from the revenue survey records. The figures for all unsurveyed villages are based on estimates. Of the total area (48,641,315 acres) entered in columns 5 and 6 for 1912-13, (page 22) 44,482,611 are based on actual returns and 4,158,704 on estimates

(a) Constructed out of Hyderabad and Thar and Parkar districts in 1912-13

Column 2 states the area as returned by the provincial revenue survey and settlement department, supplemented in the case of Native States by the returns of the topographical survey. The revenue survey being incomplete in Sind, the exact area is not known: the column states the area of surveyed tracts plus the estimated area of unsurveyed tracts.

Columns 5 and 6.—The figures of column 5 are repeated in column 6, because the areas in village papers are derived from the revenue survey records. The figures for all unsurveyed villages are based on estimates. Of the total area (30,271,132 acres) entered in these columns for 1912-13, 30,146,224 are based on actual returns and 124,908 on estimates

Table I—continued

No. 14—AREA (IN ACRES) OF EACH DISTRICT IN THE PROVINCE OF AGRA

| DISTRICT                                            | Area according to professional survey | DEDUCT                         |                                 | Net area by professional survey | Corresponding area in village papers                               |

(a) Rampore, Tehri, and Benares. In 1910-11 the area of the Family Domains of the Maharaja of Benares situated in the Mirzapur district was constituted as the State of Benares. This area has therefore been excluded from that year from the area of the Mirzapur district and included under the head "Feudatory and Tributary States not included in the area of any British district. The portion of the Maharaja's domains situated in the Benares district remains British Territory.

Columns 5 and 6—For tracts which possess no agency for collecting statistics, the figures are based on estimates. Of the total area (52,803,615 acres) entered in column 6 for 1912-13 for the Province of Agra, 45,412,615 are based on actual returns and 7,391,000 on estimates.

Columns 2, 5 and 6.—Where there has been no professional survey of the district, estimates framed in the best manner possible are accepted, subject to revision from time to time as surveys extend. Approximate figures for the Chin Hills and for the Kachin Hills (in the Bhamo, Myitkyina and Katha districts) have been included from 1906-07 and for the Pakokku Hill Tracts from 1907-08. Of the total area (53,804,895 acres) entered in columns 5 and 6 for 1912-13 for Upper Burma (page 36), 16,677,766 are based on actual survey and 37,127,129 on estimates

(a) Decrease due to revision of estimate

Columns 2, 5 and 6.—For the unsurveyed areas of zamindari estates and waste land grants for which accurate statistics are not available, the figures are based on estimates. In the Central Provinces the zamindars are chiefs of minor importance (or their successors) who, while holding large and compact estates on privileged tenure, have been restricted to the rank of ordinary subjects

The variations in the areas shown in different years under the same item in the same province or district do not necessarily represent an actual increase or decrease on the area in question. In many cases a revised classification or the correction of a faulty estimate is responsible for the change.

*Column 2.*—"Forests" means "any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area cropped). The forest areas do not agree in most cases with those stated in the reports on the administration of the Forest Department for various reasons, the chief amongst which are these: (1) because the forest administration reports and the statements of agricultural statistics relate in many cases to different periods, (2) because the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics exhibit in addition forest areas administered by district officers, and (3) because, on the other hand, certain village lands worked and returned by the Forest Department are not treated as forests in the returns of agricultural statistics and are therefore excluded from this column.

*Column 3* includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

*Column 4* includes groves not classed in the cropped area. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

# CLASSIFICATION OF AREA (ALL PROVINCES)

| IRRIGATED FROM          |           |               |            | AREA OF CROPS IRRIGATED |                          |                          |                              |               | PROVINCE |

Columns 8 to 13 state the area actually irrigated during the year, areas cropped more than once being counted once only

Columns 14 to 18 state the gross area of irrigated crops, areas cropped more than once being counted as separate areas for each crop. The excess in some cases of the total area of crops irrigated (column 18) over the total area irrigated (column 13) is thus due to the inclusion in column 18 of the area irrigated at both harvests

(a) Includes 1,700 acres in Rajshahi for which details are not available

(b) Includes 35,900 acres in Naini-Tal, Almora, and Garhwal for which details are not available

(c) Includes 26,777 acres in Purnea for which details are not available

## CLASSIFICATION OF AREA

48

(ALL PROVINCES)

Table II—continued

No. 25.—CLASSIFICATION OF THE AREA (IN ACRES) OF EACH PROVINCE IN BRITISH INDIA—continued

\* See explanation given in the footnotes (page 46)

(a) Includes reserved and protected forests only. The management of the latter having been transferred to the revenue authorities, the figures shown in the forest administration report represent the area of reserved forests, which slightly differ from those adopted for this table because the periods embraced are different.

(b) Includes unculturable Government waste and unculturable *banés*.

(c) States the estimated area of culturable Government waste.

(d) Shows (1) the estimated area of culturable *banés*, and (2) the difference between the net area cropped and the gross area of the actual holdings (exclusive of *banés*). It thus includes the unculturable lands within the actual holdings, the area of which cannot be ascertained.

# CLASSIFICATION OF AREA (ALL PROVINCES)

Column 2.—Includes the area cultivated within forests, and excludes the area of forests in the Native State of Sandur, in Bellary, not included in the village papers. As the latter is included in the forest administration report, it accounts partly for the disagreement of its figures with those in this table.

Column 4.—Includes from 1911-12 areas occupied by *babul* and *casuarina* trees when they do not form parts of forest areas. Prior to 1911-12, such areas were classed under "Miscellaneous non-food crops" in table III.

Column 5.—Includes all occupied waste, that is to say, waste portions of land for which revenue is paid.

Column 6.—Of the total net cropped area for 1912-13 (34,605,903 acres) stated in this column (page 60), 28,693,474 acres are based on actual returns, and 5,912,429 on estimates.

# CLASSIFICATION OF AREA (MADRAS)

| IRRIGATED FROM |         |               |           | AREA OF CROPS IRRIGATED |                          |                          |                              |           | DISTRICT           |

Column 10.—The term "tanks" refers to a particular kind of dammed reservoirs. These reservoirs are formed by throwing dams across the valleys of small rivulets and streams to intercept water during the rains.

Column 13.—Of the total area irrigated in 1912-13 (9,897,750 acres, page 61) 7,643,370 are based on actual returns, and 2,254,380 on estimates.

CLASSIFICATION OF AREA  
(MADRAS)

NOTE.—Figures for unsurveyed villages are based on estimates.

Column 2.—Includes land administered by the Forest Department whether formally declared forest under an Act or not, and differs from the area stated in the forest reports, because in certain localities, where the settlement is incomplete, the original areas are still returned by the Forest Department, while revised areas are returned in this table; also because the revenue records do not always state the most recent revisions.

Column 3.—Includes all land recorded at the survey and settlement as unculturable, though at times a very small quantity of this land is cultivated.

Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.

Column 6.—Of the total net cropped area (25,180,263 acres) entered in this column for 1912-13 (page 64), 23,712,182 acres are based on actual returns, and 1,468,081 on estimates.

CLASSIFICATION OF AREA  
(BOMBAY)

| IRRIGATED FROM |         |               |         | AREA OF CROPS IRRIGATED |                          |                          |                              |         | DISTRICT            |
|----------------|---------|---------------|---------|-------------------------|--------------------------|--------------------------|------------------------------|---------|---------------------|
| Tanks          | Wells   | Other sources | Total   | Wheat                   | Other cereals and pulses | Miscellaneous food crops | Miscellaneous non-food crops | Total   |                     |

(a) See note on (page 23)

Column 2.—The figures do not agree with those in the forest administration report, because the revenue records do not state the most recent alterations of area due to erosion by the Indus which the forest report does, and because, on the other hand, the forest report does not always exhibit the most recent alteration of area effected by the revision survey, which the revenue records do.

Column 6.—Of the total net cropped area (3,990,570 acres) entered in this column for 1912-13, 3,989,303 acres are based on actual returns and 1,267 acres on estimates.

CLASSIFICATION OF AREA  
(SIND)

NOTE.—From 1908-07 estimates have been prepared and included for Almorah, Garhwal, the hill portion of Nainital and of pargana Kera Mangraur in Mirzapur, for which complete figures were not available before. From 1910-11 the estimated area of the hill portion of pargana Kera Mangraur in Mirzapur has been omitted owing to its inclusion in the Benares State.

Column 2.—Includes forest areas administered by the district officers of some districts. Hence the figures do not agree with those in the forest administration report which exclude these areas. This column also includes the Siwalik Range in the Dehra Dun district.

Column 5.—The maximum period for which land left untilled is reckoned as fallow is three years.

Column 6.—Of the total net cropped area (26,784,228 acres, page 74) entered in this column for 1912-13 for the Province of Agra, 26,180,228 acres are based on actual returns and 604,000 on estimates.

CLASSIFICATION OF AREA  
(AGRA)

| IRRIGATED FROM |         |               |         | AREA OF CROPS IRRIGATED |                          |                          |                              |         | DISTRICT             |
|----------------|---------|---------------|---------|-------------------------|--------------------------|--------------------------|------------------------------|---------|----------------------|
| Tanks          | Wells   | Other sources | Total   | Wheat                   | Other cereals and pulses | Miscellaneous food-crops | Miscellaneous non-food-crops | Total   |                      |

Columns 8 to 13.—Government canals include private canals except in Naini Tal, for which district separate figures for private canals have been obtained. From 1903-04 however, the areas irrigated from certain private canals in Budaun and Basti, from 1907-08 such areas in Gorakhpur, and from 1911-12 those in Dehra Dun, which were formerly included under "other sources," have been shown under the proper head "private canals." There are very few private canals in the United Provinces.

Of the total area irrigated in the Province of Agra in 1912-13 (7,441,283 acres page 75), 7,408,383 acres are based on actual returns and 35,900 on estimates.

CLASSIFICATION OF AREA  
(AGRA)

Column 2 includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality.

Column 3.—This column includes 23,680 acres of river beds in Gurgaon, 15,360 acres of mountain tracts in Simla, and 3,898,960 acres of mountain tracts in Kangra. These areas are not accounted for in the village papers, and the figures are based more or less on estimates.

Column 4 includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In certain districts in the south-west of the province, however, the classification is amended annually.

(a) See note (2) given at foot. (page 32)

# CLASSIFICATION OF AREA (PUNJAB)

NOTE.—For tracts outside the surveyed area the figures are based on estimates framed in the best manner possible.  
Column 2.—The area entered in this column is that given in the forest administration report, and includes reserved forests and fuel reserves. From 1901-07 estimates of the forest areas in certain hill tracts have also been included.  
Column 3.—In settled tracts the unculturable area is taken from settlement registers, but in unsettled tracts it is obtained from the best source available.  
Column 4 includes land thrown out of cultivation and abandoned. Groves, not classed in the cropped area, and bamboos, when not grown in forest areas, are also included in this column.  
Column 5 includes only such land left uncultivated as is actually in possession of cultivators. In Lower Burma (excluding the Thayetmyo district) such lands are assessed at privileged rates, but in Upper Burma and in Thayetmyo no assessment is levied on land left uncultivated.

CLASSIFICATION OF AREA  
(UPPER BURMA)

| IRRIGATED FROM |       |               |         | AREA OF CROPS IRRIGATED |                          |                          |                              |         | DISTRICT              |

*Column 2.*—Shows the areas administered by the Forest Department; but the figures differ from those in the forest administration report, because the actual area of the forest is not known owing to incomplete survey, also because excisions made have not yet been taken note of in the forest registers, and because in many cases raiyatwari villages settled, thekadari villages surveyed, clearance leased villages earned in proprietary rights, and villages purchased under the waste-land sale rules, have not as yet been finally disforested and struck off the forest registers. In the case of the Chanda, Drug, Raipur, and Bilaspur districts this column also includes all areas in the zamindars' estates which fall outside the surveyed villages of those estates. These areas are almost wholly under forest and include only a negligible proportion of sparse and shifting cultivation.

*Column 3.*—States areas covered with water, hill, or rock, and land occupied by buildings and roads.

*Column 4.*—States (1) the waste area within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub jungle or grass, and (4) groves not included in holdings.

*Column 5.*—Land which has been fallow for not more than three years is reckoned as current fallow.

# CLASSIFICATION OF AREA (CENTRAL PROVINCES)

| IRRIGATED FROM |        |               |        | AREA OF CROPS IRRIGATED |                          |                          |                              |        | DISTRICT           |
|----------------|--------|---------------|--------|-------------------------|--------------------------|--------------------------|------------------------------|--------|--------------------|
| Tanks          | Wells  | Other sources | Total  | Wheat                   | Other cereals and pulses | Miscellaneous food-crops | Miscellaneous non-food-crops | Total  |                    |

Column 2.—Includes the forest area administered by the Forest Department, but excludes a large area of cultivated land in the Melghat taluk in Amraoti shown as forest in the forest report

Column 3.—Includes village sites, tanks, and land taken up for public purposes or devoted to uses other than agriculture; it also includes unculturable portions of culturable fields

Column 4.—Includes land available for cultivation but not given out

Column 5.—Includes occupied culturable land left fallow for private reasons, such as grazing, rotation, etc.

# CLASSIFICATION OF AREA (BERAR)

| IRRIGATED FROM |        |               |        | AREA OF CROPS IRRIGATED |                          |                          |                              |        | DISTRICT |

Column 2—The figures represent reserved forests, but from 1909-10 the areas of forest villages within the reserves have been excluded from this column and entered under the appropriate heads of this table

Columns 3 and 4—The figures for unsurveyed tracts in Cachar and for permanently settled tracts in Sylhet are based on estimates. In the Assam Valley unsurveyed waste is divided into culturable and unculturable on the assumption that their proportion in the surveyed area holds good

Column 5—Includes generally all lands which are thrown out of cultivation or not cultivated, but which remain in the occupation of leaseholders. Figures for the Naga and the Lushai Hills are rough estimates

Column 6—The figures are obtained from the district crop statement for districts which have been cadastrally surveyed

CLASSIFICATION OF AREA  
(ASSAM)

| IRRIGATED FROM |       |               |         | AREA OF CROPS IRRIGATED |                          |                          |                              |         | DISTRICT        |

Column 2—Includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality, and protected village waste in Hazara administered by the district officer and other waste lands in Peshawar

Column 4—Includes large areas of Government waste not allotted for cultivation

Column 5—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In Dera Ismail Khan classification is amended according to area of each class of soil actually cultivated each year

# CLASSIFICATION OF AREA (N. W. FRONTIER)

This table shows the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by the provincial authorities.

The variations in the areas shown in different years under the same crop in the same district do not in all cases represent an actual increase or decrease in the area under that crop. In certain cases a revised classification or the correction of a faulty estimate is responsible for the change.

Column 10 (other food-grains including pulses).—Arhar (pigeon pea), barbatilobia or chowli (asparagus), mung (green gram), kulthi (horse gram), urad (black gram), cheick (job's Tear), lentils, cheena (common millet), kangni (Italian millet), kodo or varagu, kutki (little millet), peas, pigeon or bottle grass, swank or shama, chickling vetch, buck wheat.

Column 28 (other dyes).—Arnatto, henna, madder, morinda, safflower.

Column 31.—In certain cases, notably in Madras, the areas stated under "Tea" differ from those given in the special report on tea production published separately. The principal reason is that the special report is prepared from returns received from managers and owners of estates; and these returns, especially in Southern India, are inaccurate and defective. Minor discrepancies are also due to the fact that the figures in this table deal with the agricultural year; while those in the special report deal with the calendar year.

Column 35 (other drugs and narcotics).—Areca nut, sweet basil, betel-vine, country borage, dhatura, purple flea-bane, isafgul, senna.

# AREA UNDER CROPS (ALL PROVINCES)

The area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements, is assigned to the principal crop by the village accountant. The areas of important mixed crops, namely, wheat and barley, wheat and gram, barley and gram, jawar and arhar, bajra and arhar, and cotton and arhar, for which separate headings are provided in the crop statements, are distributed in accordance with prescribed formulæ and entered under the crops of which they are composed.

Columns 3, 4, 9, and 11.—The whole of the area of the land planted with food-grains (wheat, barley, gram, etc.) mixed with oilseeds is shown under food-grains in this table. The area shown under food-grains which was really planted with oilseeds (as a mixed crop) is roughly estimated to have been 3,940,000 acres in the whole of the United Provinces of Agra and Oudh in 1912-13.

Columns 12, 13, and 14.—The figures shown in these columns represent areas under "pure" oilseeds, i.e. oilseeds sown unmixed with any other crop. Besides these, the oilseeds are thinly sown in combination with wheat, barley, gram, and other crops. If the areas occupied by the scattered plants were added up, it is estimated very roughly that they would amount in 1912-13 (for the whole of the United Provinces of Agra and Oudh) to 667,000 acres of linseed, 900,000 acres of sesamum, and 2,373,000 acres of rapeseed.

Table III—continued

NO. 46—AREA (IN ACRES) UNDER CROP, AND SPECIFICATION OF CROPS, IN EACH DISTRICT IN THE PROVINCE OF AGRA—continued
